Definition: Currency from which the quoted currency is converted in an exchange rate calculation.

$1 \times \text{<UnitCcy>} = \text{<XchgRate>} \times \text{<QtdCcy>}$.

Impacted by: C2 "ActiveCurrency"

Datatype: "ActiveCurrencyCode" on page 2552

Constraints

- **ActiveCurrency**

The currency code must be a valid active currency code, not yet withdrawn on the day the message containing the currency is exchanged. Valid active currency codes are registered with the ISO 4217

Maintenance Agency, consist of three (3) contiguous letters, and are not yet withdrawn on the day the message containing the Currency is exchanged.

66.1.21.3.4 QuotedCurrency <QtdCcy>

Presence: [1..1]

Definition: Currency into which the unit currency is converted in an exchange rate calculation.

$1 \times \text{<UnitCcy>} = \text{<XchgRate>} \times \text{<QtdCcy>}$.

66.1.21.3.5 ExchangeRate <XchgRate>

Presence: [1..1]

Definition: Factor used for the conversion of an amount from one currency into another. This reflects that amount of the quoted currency that can be purchased with one unit of the unit currency, as follows:

$1 \times \text{CUR1} = \text{nnn} \times \text{CUR2}$,

where:

CUR1 is the unit currency

CUR2 is the quoted currency

nnn is the exchange rate.

$1 \times \text{<UnitCcy>} = \text{<XchgRate>} \times \text{<QtdCcy>}$.

Datatype: "BaseOneRate" on page 2681

66.1.21.3.6 QuotationDate <QtnDt>

66.1.24.9.32 ControllingParty <CtrlgPty>

Presence: [0..1]

Definition: Party is the controlling person.

(For an Entity that is a legal person, the term "Controlling Persons" means the natural person(s) who exercises control over the Entity. "Control" over an Entity is generally exercised by the natural person(s) who ultimately has a controlling ownership interest in the Entity. A "control ownership interest" depends on the ownership structure of the legal person and is usually identified on the basis of a threshold applying a risk-based approach (e.g. any person(s) owning more than a certain percentage of the legal person, such as 25%). Where no natural person(s) exercises control through ownership interests, the Controlling Person(s) of the Entity will be the natural person(s) who exercises control of the Entity through other means. Where no natural person(s) is identified as exercising control of the Entity, the Controlling Person(s) of the Entity will be the natural person(s) who holds the position of senior managing official.).

66.1.24.12.32 ControllingParty <CtrlgPty>

Presence: [0..1]

Definition: Party is the controlling person.

(For an Entity that is a legal person, the term "Controlling Persons" means the natural person(s) who exercises control over the Entity. "Control" over an Entity is generally exercised by the natural person(s) who ultimately has a controlling ownership interest in the Entity. A "control ownership interest" depends on the ownership structure of the legal person and is usually identified on the basis of a threshold applying a risk-based approach (e.g. any person(s) owning more than a certain percentage of the legal person, such as 25%). Where no natural person(s) exercises control through ownership interests, the Controlling Person(s) of the Entity will be the natural person(s) who exercises control of the Entity through other means. Where no natural person(s) is identified as exercising control of the Entity, the Controlling Person(s) of the Entity will be the natural person(s) who holds the position of senior managing official.).

OFFR	Offer	Price is the calculated offer price of a dual-priced investment fund (offer-bid prices), that is, the buying price of the units for an investor.
NAVL	NetAssetValue	Price is the net asset value per unit that is used either as a transacting price for a single-priced investment fund class, or as a notional price for the calculation of other prices.
CREA	Creation	Price is the calculated creation price of a dual-priced investment fund (creation-cancellation prices) and the highest possible buying price of the units before the initial charge. The actual buying or offer price, which includes charges, will be higher.
CANC	Cancellation	Price is the calculated cancellation price of a dual-priced investment fund (creation-cancellation price), and the lowest possible valuation of the units on any one-day. The actual selling or bid price is usually higher.
INTE	Interim	Price is the non-official interim price given to an investor before the executed price.
SWNG	Swing	Price is the calculated net asset value price of a single-priced investment fund. The price is adjusted to take into account the dealing costs due to individual large deals, or due to a significant imbalance in volumes of subscriptions vs redemptions, as an alternative to dilution levy.
MIDD	Mid	Price is the average price between the bid and offer prices.
RINV	Reinvestment	Price is the price used when reinvesting units after distribution.
SWIC	Switch	Price is the price used when transferring units between products.
DDVR	DailyDividendRate	Price is the net income of a financial instrument, calculated on each dealing day, and divided by all the units outstanding on that day.
ACTU	Actual	True offer price.
NAUP	NonAdjustedUnpublished	The original NAV before the price of the investment fund was swung.
GUAR	Guaranteed	Price is a guaranteed price.
ENAV	EstimatedNAV	Price is an estimated net asset value per unit.

Constraints

- **BookTransferGuideline**

In the case of an own account internal transfer, the account of (delivering) Party2 at (delivering) Party1 must be provided.

For more details, see the relevant market practice document on www.smpg.info.

- **DepositoryGuideline**

In a delivery, the receiving depository is to be understood as the requested depository of the receiving counterparty.

In a receive, the delivering depository is to be understood as the requested depository of the delivering counterparty.

The field must be populated with the BIC of a national or international CSD. When no CSD exists in a particular market, the stock exchange BIC will be used.

Country code should be used for settlement taking place outside of an institution published in the PSET's BIC list. This includes physical deliveries and investment funds not settling at a CSD.

The format and content of the settlement party sequences will comply with the market practices published for the counterparty depository included in the message.

For more details, see the relevant market practice document on www.smpg.info.

66.1.50.4.1 Type <Tp>

Presence: [1..1]

Definition: Corporate action event type expressed as a code.

Datatype: "[CorporateActionEventType1Code](#)" on page 2565

CodeName	Name	Definition
DRIP	DividendReinvestment	Event is a dividend payment type where cash dividend is rolled over into additional shares in the issuing company.
CAPG	CapitalGainsDistribution	Event is the distribution of profits resulting from the sale of securities. Shareholders of mutual funds, unit trusts, or Sicavs are recipients of capital gains distributions and are often reinvested in additional shares of the fund.
DVCA	CashDividend	Event is a distribution of cash to shareholders, in proportion to their equity holding. Ordinary dividends are recurring and regular. The shareholder must take cash and is not offered a choice in the form of distribution.
DVOP	DividendOption	Event is a distribution of a dividend to shareholders with the choice of payment method. The shareholder must choose the form of payment - stock, cash, or both.
DVSE	StockDividend	Event is a dividend paid to shareholders in the form of shares of stock in the issuing company or in another company. The shareholder must take stock and is not offered a choice in the form of distribution.

CodeName	Name	Definition
LIQU	Liquidation	Event is a liquidating dividend or liquidation that consists of a distribution of cash, assets, or both. Debt may be paid in order of priority based on preferred claims to assets specified by the security. The security holder may be able to choose the form of liquidation distribution.
MRGR	Merger	Event is a mandatory or voluntary exchange of outstanding securities as the result of two or more companies combining assets. Cash payments may accompany share exchange.
NAME	NameChange	Event is a name change. The issuing company changes its name. The event shows the change from old name to new name and may involve surrendering physical shares with the old name to the registrar.
SOFF	SpinOff	Event is a demerger or distribution or an unbundling. It is a distribution of subsidiary stock to the shareholders of the parent company without a surrender of shares. A spin-off represents a form of divestiture resulting in an independent company. Normally this is without cost to the parent issue shareholder.
SPLF	StockSplit	Event is a change in nominal value, a subdivision. It is an increase in a corporation's number of outstanding shares of stock without any change in the shareholder's equity or the aggregate market value at the time of the split. Stock price and nominal value are reduced accordingly.
SPLR	ReverseStockSplit	Event is a change in nominal value, a consolidation. It is a decrease in number of outstanding shares of stock without any change in the shareholder's equity or the aggregate market value at the time of the split. Stock price and nominal value are reduced accordingly.
TEND	Tender	Event is an acquisition or take-over or offre publique de retrait (FR) or purchase offer or buy-back. It is an offer made to shareholders requesting them to sell (tender) their shares for a specified price usually at a premium over prevailing market price. Generally, the objective of a tender offer is to take control of the target company.
BONU	BonusIssue	Event is a bonus issue or scrip issue or capitalisation issue. Security holders are awarded additional assets free of payment from the issuer in proportion to their holding. A bonus issue is typically represented by shares, rights or

CodeName	Name	Definition
		warrants. Nominal value doesn't change. Holder may be offered choice of form.
RHDI	RightsDistribution	Event is the distribution of rights to shareholders, in proportion to their equity holding.
EXRI	CallOnRights	Event is a call or exercise on nil-paid securities or rights resulting from a rights distribution (RHDI). This is to be used for the second event in those cases where the rights issue is dealt with in two events, the first event being the rights distribution (RHDI).
CHAN	Change	Event is a generic change. For example, a change in the terms of an issue, a change in the identification of a security, change of a board lot, a change from global to definitive.
REDO	Redenomination	Event by which the unit (currency and/or nominal) of a financial instrument is restated, eg, the debt in a national currency is restated in euro.
EXOP	ExchangeOption	Event is an option for the shareholders to exchange their securities for other securities and/or cash. Exchange options are mentioned in the terms and conditions of a security and are valid during the whole lifetime of a security.
EXOF	ExchangeOffer	Event is an exchange offer or capital reorganisation. It is an offer to shareholders to exchange their holdings for other securities and/or cash. Exchange offers are usually voluntary involving the exchange of outstanding security for a different security or securities and/or cash.
DECR	DecreaseInValue	Event is a reduction of the share capital and face value of a single share. The number of the circulating shares remains unchanged. It may include a capital pay-out to shareholder.

Constraints

- **BookTransferGuideline**

In the case of an own account internal transfer, the account of (delivering) Party2 at (delivering) Party1 must be provided.

For more details, see the relevant market practice document on www.smpg.info.

- **DepositoryGuideline**

In a delivery, the receiving depository is to be understood as the requested depository of the receiving counterparty.

In a receive, the delivering depository is to be understood as the requested depository of the delivering counterparty.

The field must be populated with the BIC of a national or international CSD. When no CSD exists in a particular market, the stock exchange BIC will be used.

Country code should be used for settlement taking place outside of an institution published in the PSET's BIC list. This includes physical deliveries and investment funds not settling at a CSD.

The format and content of the settlement party sequences will comply with the market practices published for the counterparty depository included in the message.

For more details, see the relevant market practice document on www.smpg.info.
