If modification codes are used (in that case, they must be used everywhere): the organisation will specify under the "Account" and "Organisation" tags which elements must be added, deleted, modified, or if they are unchanged.

The AccountExcludedMandateMaintenanceAmendmentRequest message is sent from an organisation to a financial institution as part of the account maintenance process. It is sent in response to a request from the financial institution to send additional information. Usage: this update is about account details excluding any mandate information.

If modification codes are not used: the organisation will specify under the "Account" and "Organisation" tags the complete information as it should be in the financial institution's records after processing the update request.

If modification codes are used (in that case, they must be used everywhere): the organisation will specify under the "Account" and "Organisation" tags which elements must be added, deleted, modified, or if they are unchanged.

12 acmt.017.001.05 AccountMandateMaintenanceRequestV05

12.1 MessageDefinition Functionality

The AccountMandateMaintenanceRequest message is sent from an organisation to a financial institution as part of the account maintenance process. It is the initial request message to update one or several accounts. Usage: this update is only about mandate information.

If modification codes are not used: the organisation will specify under the "Mandate" and "Group" tags the complete information as it should be in the financial institution's records after processing the update request.

If modification codes are used (in that case, they must be used everywhere): the organisation will specify under the "Mandate" and "Group" tags which elements must be added, deleted, modified, or if they are unchanged.

It is not possible to update the account characteristics or organisation information with this message.

14 acmt.019.001.04 AccountClosingRequestV04

14.1 MessageDefinition Functionality

Outline

The AccountClosingRequestV04 MessageDefinition is composed of 10 MessageBuildingBlocks:

A. References

Set of elements for the identification of the message and related references.

B. From

Identifies the business sender of the message, if it is not the account owner or account servicing financial institution.

C. AccountIdentification

Unique and unambiguous identification of the account between the account owner and the account servicer.

D. AccountServicerIdentification

Unique and unambiguous identifier of a financial institution, as assigned under an internationally recognised or proprietary identification scheme.

E. OrganisationIdentification

G. BalanceTransferAccount

Identification of the account to which the remaining positive balance of the account to be closed must be transferred or account from which funds can be moved to the account to be closed and which balance is negative. For a positive balance to be transferred, an account in another financial institution might be used. In that case the account servicer is mandatory.

H. TransferAccountServicerIdentification

Unique and unambiguous identifier of a financial institution, as assigned under an internationally recognised or proprietary identification scheme, that is the servicer of the transfer account.

I. DigitalSignature
