

## REQUEST FOR ISO 20022 DATA SOURCE SCHEME (DSS) REGISTRATION

*Note: the purpose of this document is to give guidelines to organizations that want to propose use of a proprietary code set in specific Message Components where the use of a Data Source Scheme has been approved. The request may concern use of either a new DSS in a specific context (MessageComponent) or an existing DSS in a new context (MessageComponent). Such requests are processed by the ISO 20022 RA. The DSS request must include the following captions, as described. DSS Changes requests are to be submitted through the ISO 20022 website through following e-request: [ISO 20022 Request for the update of the Data Source Scheme list](#), in which this template must be attached.*

### A. Requesting organization:

- Organization/group/community name :- Euroclear Finland
- Address :- Urho kekkosen katu 5c Helsinki 001001
- Country :- Finland
- Phone number :- +358 20 7706000
- E-mail address. :- settlement.finland(at)euroclear.com

### B. Description of the request:

- Identify the MessageComponent(s) in which the proposed DSS will be used.  
[GenericIdentification used for Proprietary Party identification \(e.g., receiving settlement party1\)](#)
- If the request concerns the use of an existing DSS in the above mentioned MessageComponent(s), please identify the existing DSS by its data source issuer and its data source scheme name, if any.

[We would like to update data source issuer code to \*\*NCSB\*\* instead of currently published \*\*APKE\*\* for country Finland. There is no Scheme name.](#)

- If the request concerns the registration of a new DSS for use in the above mentioned MessageComponent(s), please specify:
  - o the proposed data source issuer (4-character code – *another code may be proposed by the RA*) and its meaning
  - o if several code sets are proposed by the issuer, the data source scheme name proposed for each code set (up to 4 characters – *another name may be proposed by the RA*) and its meaning
- Example of how the DSS will be used.

```
<Pty2>  
  <Id>  
    <PrtryId>  
      <Id>PROPID123</Id>
```

```
<Issr>NCSD</Issr>  
</PrtryId>  
</Id>  
</Pty2>
```

### C. **Justification:**

Description of the community of users of the requested DSS and why it requires use of this proprietary code set.

Euroclear Finland has been using NCSD for - GenericIdentification used for Proprietary Party identification (e.g., receiving settlement party1). However, it was not updated in the ISO 20022 Data Source Schemes (DSS) document.
